

Specification of Sodium Percarbonate

Sodium Percarbonate is an oxidizing agent, sodium Percarbonate is an ingredient in a number of home and laundry cleaning products, including bleach products such as OxiClean, Tide laundry detergent and Vanish. It can be used in organic synthesis as a convenient source of anhydrous H₂O₂, in particular in solvents that cannot dissolve the carbonate but can leach the H₂O₂ out of it

Product Name : SODIUM PERCARBONATE		
CAS No.	15630-89-4	
Molecular Formula	Na ₂ CO ₃ ·1.5H ₂ O ₂	
Molecular Weight	157	
Description	White granular / Powder	
Specifications	Effective Active Oxygen %	Min. 13 %
	Iron Content	Max. 20 ppm
	Apparent Density gm/cm ³	Max. 0.98
	Active Water	Max. 2 %
	pH Value (3% Aqueous Solution)	10 -11
	Stability	Min. 55
	Solubility	14.5 gm/l
	Granule Diameter	Max. 1 MM
